

# Bot onMessage Expand

Mr. Poole  
Python

# A little more about onMessage!

So far we've compared with *message.content.startswith*

```
if message.content.startswith('jp_hello'):
```

We can also compare with `==` to compare exact messages!

```
if message.content == ('jp_hello'):
```

## Reference User name

The below references the author of the message's name.

```
message.author.name
```

## Lab: Message Jokes

1. Recreate your Joke lab in Discord!
2. Create a new command for jokes
3. Have a list of at least 5 jokes
4. Send a random joke when the command is mentioned!
